

Aim: To implement basic shell commands and shell scripts

```
sushmit@SushmitEnvy:~$ echo $0
-bash
sushmit@SushmitEnvy:~$ vi abc.sh
sushmit@SushmitEnvy:~$ ./abc.sh
-bash: ./abc.sh: Permission denied
sushmit@SushmitEnvy:~$ chmod +x abc.sh
sushmit@SushmitEnvy:~$ ./abc.sh
Hello World
sushmit@SushmitEnvy:~$ cat abc.sh
#!/bin/bash
echo "Hello World"
sushmit@SushmitEnvy:~$
```

```
sushmit@SushmitEnvy:~$ ./abc2.sh
My host name is SushmitEnvy
sushmit@SushmitEnvy:~$ cat abc2.sh
#!/bin/bash
host=$(hostname)
echo "My host name is " $host
```

```
sushmit@SushmitEnvy:~$ cat abc3.sh
#!/bin/bash
Name = "Sushmit"
Age = "19"
echo "what is your college name ?"
read Collegename
echo "My name is " $Name
echo "My age is " $Age
echo "My college name is " $Collegename
sushmit@SushmitEnvy:~$ vi abc3.sh
sushmit@SushmitEnvy:~$ ./abc3.sh
what is your college name ?
SIT
My name is Sushmit
My age is 19
My college name is SIT
sushmit@SushmitEnvy:~$
```
